TECHNICAL LETTER 2021-03 03 December 2021

Subject: Continuation of Ships in the Extended Drydock Program

In 2010 the Liberian Administration implemented a Scheme for Extending Dry Dock Intervals (i.e. EDD program). Under the scheme ships enrolled in the EDD program were allowed to be dry-docked at seven and a half year intervals provided two consecutive alternative in water surveys (IWS) are satisfactorily conducted during the intervening period.

Ships could apply for enrolled in the EDD program at the latest by the ship's 10 year dry-docking survey. Subject to the ship satisfactorily passing all IWS and out of water surveys when due, a ship could remain the EDD program until the ship reaches 15 years of age. The program could possibly be extended until a ship reaches 20 years of age, subject to satisfactory service experience.

Flag Administration and Classification Society approval is required in for continuation of a ship in the EDD program.

This technical letter provides guidance on the continuation of vessel in the EDD program:

1. after expiration of a vessel's initial EDD enrollment
2. after a vessel reached 15 years of age
3. after a change of owners or management company
4. after registration of a vessel under the Liberian flag that was enrolled in the EDD program of its previous flag state

1. Continuation in the EDD program after expiration of a vessel initial EDD enrollment.

In order to continue in the EDD program after the end of the initial 7.5 year drydock interval a vessel must be evaluated by the Administration for re-enrollment in the EDD program. The vessel owners will be required to:

- a. complete and submit the Liberian Administration Extended Dry Dock Questionnaire to Administration for review.
- b. provide, or have the vessel's class society provide on behalf of the owners, a recommendation from the class society that the ship be re-enrolled in the EDD program and a copy of the ship's survey status report including any outstanding CoCs, memos, deficiencies and, recommendations.

In addition, if not available via from the class society website, the Administration will request that the vessel's class society provide for review:

- a. Last class and statutory renewal reports. Two reports of renewal surveys will be reviewed if last renewal was less than one year old (i.e. if last renewals was in 2020, then the 2015 renewal reports are also reviewed).
- b. Last intermediate and last two annual class and statutory survey reports.

In addition, if not available via from the class society website, the Administration will request that the recognized organization that issued the ISM certificates provide for review:

- a. The last ISM annual audit report and the last renewal audit report including corrective action history including both completed and outstanding actions.

Upon completion of the satisfactory review of the above listed information the Administration will re-enroll the ship in the EDD program authorizing another 7.5 year drydock interval.

2. Continuation in the EDD program after a vessel reached 15 years of age

Ships that are 10 years or older but less than 13 years of age will be allowed to re-enroll in the EDD program subject to compliance with the conditions listed in Item 1 above.

3. Continuation in the EDD program after change of owner and/or management.

Owners of ships that change owners or management during the 7.5 year interval of the EDD enrollment will be required to completed and submit the Liberian Administration Extended Dry Dock Questionnaire to Administration for review. The emphasis of this review will be on the new owner/management company to determine the company's PSC history and ISM compliance history. Upon satisfactory completion of the review the Administration will authorize continuation of the ship in the EDD program in the name of the new owners/management company.

4. Continuation in the EDD program after registration of a vessel under the Liberian flag that was enrolled in the EDD program of its previous flag state

In order to continue in the EDD program after change of flag to Liberia a vessel must be evaluated by the Administration for re-enrollment in the Liberian Administration EDD program. The vessel owners will be required to completed and submit the Liberian Administration Extended Dry Dock Questionnaire to Administration for review.

The vessel's class society will be requested to provide a recommendation that the ship be enrolled in the Liberian Administration's EDD program and a copy of the ship's survey status report including any outstanding CoCs, memos, deficiencies and, recommendations. Upon satisfactory completion of the review the Administration will authorize continuation of the ship in the EDD program. The expiration of the 7.5 year drydock interval will remain the same as granted by the vessel's previous flag state.

If you have any questions on this Technical Letter please contact this office at regsandstandards@liscr.com.
